

I was very warmly welcomed at the Karl-Franzens University in Graz, Austria in the group of prof. Bauer. The people of the group were very helpful and cooperative. During my time there I worked on instruments and techniques that I had not had the opportunity to work on before such as Thermo Scientific Dionex ASE 150 Accelerated Solvent Extractor System, CentriVap Benchtop Vacuum Concentrator, then UHPLC hyphenated with a Q Exactiv Hybrid Quadrupole-Orbitrap.

In addition to new experiences gained by working on devices that I have not encountered before, I have made new acquaintances and new collaborators with whom I will continue to cooperate in the future , both on an already started project and on some new ones.
